

SceneCatcher

**NOW with Higher
Photo & Video
Storage!**

The innovative SCENECATCHER enables firefighters to take both snapshots and video of the images they see on their Bullard T3 and T4 Series Thermal Imagers. This new tool fosters greater understanding of fire spread and thermal activity when sizing up a structure and can aid in study during overhaul. For use as a standalone device or coupled with a Bullard Transmitter, SCENECATCHER allows you to archive incidents in full detail.

Bullard *extrem*

SCENECATCHER 2.0

SceneCatcher provides firefighters the technology and capability needed for recording and storing vital thermal imaging video and still images. Now, with capacity to record five hours of video and hundreds of still images, SceneCatcher 2.0 documents everything you need on the fire ground.

The higher resolution imagery and faster frame rates add up to an even more lifelike viewing experience, plus files transfer to your PC quicker than ever with updated USB 2.0 technology. The convenient Mini-USB to USB connection and Plug and Play interface means no complicated hardware configuration and software installation.

SEE THE ACTION

- Housed in a rugged handle
- Mounts on T3 and T4 Series Thermal Imagers

RECORD THE FOOTAGE

- Capture images or video while transmitting wireless video
- Capture five hours of video and hundreds of still images including time & date stamp

TAKE IT WITH YOU

- Download images and video through a USB connection
- Optional transmitter transmits up to a range of 300 meters

No separate viewer software required. Images and videos can be viewed using programs such as Windows® Picture, Fax Viewer and Windows® Media Player!
